

CIGRE Symposium 2027

One Grid – Technological Innovations for Integrated Power Systems

Call for Exhibition

Heidelberg, Germany · April 28–29, 2027

Every year, CIGRE organises congresses, conferences, symposia, and colloquia worldwide in the countries where CIGRE National Committees have been established, in order to give the opportunity to the delegates from the electrical power industry, to enhance their knowledge, share best-practices, discuss new developments, while building a network of partners.

The CIGRE Symposium 2027 in Heidelberg, Germany will be a key highlight of the year, offering a unique platform for knowledge exchange, collaboration and international networking. Focused on the challenges and opportunities in transmission and distribution networks, the symposium will explore critical topics related to the

energy transition. As the technical and systemic aspects of energy systems become ever more interconnected, this event provides a valuable opportunity for all to engage in meaningful discussions and share innovative solutions. Held in Heidelberg's state-of-the-art Congress Center, the symposium offers the ideal setting for professional growth and networking, while the city's rich history and academic atmosphere will inspire collaboration and new ideas. If you're passionate about shaping the future of energy, this is the must-attend event to expand your knowledge, build lasting connections, and shape the future of energy.
